Vikas Verma

Lead, Full Stack, DevOps, Backend, Cloud Engineer

Address San Jose, CA, 95118

Phone (669) 237-7387

E-mail mail@vikas.cc

Over 18 years of diversified experience into Full Stack, Backend, Cloud/DevOps engineering. Energetic, curious, language agnostic and performance driven. Always jumping into new water. Managed global software teams with onshore/offshore development and delivered many million-dollar products. Scaled on-prem monolith systems into multi-cloud, k8s clusters in micro-services based design.

Skills

Primary

React/JavaScript, NodeJS, Python/Flask, MongoDB, Postgres

Architecture Design, Scaling Out, DevOps

REST APIs / GraphQL

Microservices

Secondary

Cassandra, Elastic Stack

K8s, Helm, Docker, Puppet

Puppeteer, Selenium, SoapUI, Postman, Fiddler/Charles

Non-Technical

Product / Project Management

People Management, Operational Excellence

Hobbies

Woodworking, Tinkering

3D Printing & Designing

Audiobooks junkie

Work History

2019-08 - Current

Lead Software Engineer (Cloud Engineering)

Sight Machine, San Francisco, CA

- Cloud Orchestration product, Python/Flask backend , React/JS/TS frontend, with

Celery, Stackstorm, Helm charts to glue things together
- Better performant code, integration with Slack, SendGrid, Web Hooks, Notification Engine, RBAC Policies, Rule Based Executions
- Shorter release cycles (Pay Day Releases, every 2 weeks) from few months, resulted in reduced backlog by 35%
- Running in cloud scale containers that can Auto Scale, Scheduled Scaling, Custom Rules & Notification engine

2019-05 - 2019-08

Technical Lead

Gigya Inc. (acquired By SAP), Palo Alto, CA

- Sustained engineering lead for SAP Customer Data Cloud
- Short stint in company in sustained engineering department.
- Worked on over 30 Pull Requests in under 3 months

2011 - 2019-05

Director Of Engineering

Condeco Software Inc, Campbell, CA

- Joined as #2 employee to setup engineering team with over 6 direct and 80 indirect reports
- Rebooted company line of products with focus on cloud & micro-services and away from monolith / on-premise solutions
- Rebooted tech stack away from Classic ASP / .Net to MEAN / MERN stack & Cosmos DB, Mongo & Cassandra
- Increased team productivity over 5x by streamlining of work between support/engineering

2006 - 2011

Sustained Engineering Lead

Microsoft (India), Bangalore, India

- Part of Exchange and Outlook sustained engineering group, delivered hot-fixes, service packs, & bug fixes for all Exchange Components & Outlook Product
- Wrote API code samples in .Net, C#, ASP.net, PowerShell, VBScripts, JScript's for https://blogs.msdn.microsoft.com/vikas/
- Developed EWS Editor - https://github.com/geekvikas/ewseditor
- Shipped Exchange 2007, 2010 & Outlook 2010, VSTO & other Office SDKs

2002-01 - 2006-05

Software Engineer

Multiple Companies , New Delhi, India

Wrote code, test, debug, fix, repeat!

Education

2001-09 - 2002-01

Bachelor of Science: Computer Engineering

Institute of Management Studies - India

Certifications

2011-08	Project Management Professional
2013-02	Microsoft Certified Technology Specialist
2018-06	NodeJS Expert (Pluralsight) score 217/250
2019-07	MongoDB Expert (Pluralsight) score 218/250
2018-07	JavaScript Expert (Pluralsight) score 203/250
